

ABOUT THE INSTITUTE

The NIHF, an autonomous organization, under the Ministry of Health and Family Welfare, Government of India, acts as an 'apex technical institute' as well as a 'think tank' for the promotion of health and family welfare programs in the country. The post-graduate education, training, research, evaluation, consultancy and advisory services in the field of health and family welfare have been a major focus of the institute. In order to facilitate continuous up-gradation of knowledge and skills of various health personnel across the country, the NIHF has been conducting training courses in different areas at regular interval. In this endeavour, the Department of Management Sciences, NIHF proposes to conduct a training Course on 'Health System Management to Strengthen Health Care Delivery Services for Medical & Allied Health Professionals' from March 18-22, 2024.

New Delhi- 110 067

ABOUT THE COURSE

The NHM envisages achievement of universal access to equitable, affordable & quality health care services both in rural and urban areas. To achieve this, number of strategies has been framed. One among them is to 'Create a District Level Knowledge Centre within each District Hospital to serve as the hub for a range of tasks including, provision of secondary care and selected elements of tertiary care, and the site for skill based training for all cadres of health workers, collating and analysing data and coordinating district planning. To achieve the same, over the years, there has been an expansion of number of health care services. This has made obligatory for the Chief Medical Officers at district level along with the Deputy CMOs and Officers of various health programs to attend to a comprehensive job responsibility. Depending on the type and size of the healthcare system, the healthcare administration requires a number of teams working in unison to manage the same at every level. It is felt that due to lack of considerable exposure to various approaches of health care administration and management, it poses difficulty for the district level officers to discharge job responsibilities smoothly. Keeping this in view, a training course on "Health System Management to Strengthen Health Care Delivery Services for Medical & Allied Health Professionals" has been scheduled to be held at NIHFV from March 18-22, 2024.

The five days training course will enhance the administrative acumen of the participants by making them acquainted with various management aspects of health care services like General Procedures and Guidelines, Human Resource Management, Financial Management, Materials Management, and more importantly the management of ongoing programs and projects related to health which are not covered during regular medical education program.

GENERAL OBJECTIVE

To enhance the professional efficacy and administrative acumen of the district level health officials by providing knowledge and skills about Health System Management for strengthening district health care delivery services.

SPECIFIC OBJECTIVES

- Enumerate the standard procedures and guidelines laid down under different health programs for efficient management of district health care delivery services.
- Delineate the implementation strategies, inputs and outputs of health care services.
- Describe the significant role of capacity building, leadership techniques and communication approaches for strengthening effective delivery of health care services
- Describe the operational aspect of the Health and Wellness centres.
