CIRCULAR

An increasing number of cases of conjunctivitis are being observed throughout the Delhi- NCR. It is a contagious condition and spreads from person to person through contact from touch or shaking hands or touching a contaminated object, surface and then rubbing your eyes.

In this regard, all the Faculty and Staff are advised to follow precautions such as:

1. Avoid rubbing and touching eyes repeatedly.
2. Wash your hands frequently with soap, especially before and after touching potentially contaminated surfaces or eyes.
3. Use hand sanitizer before and after putting attendance on Biometric Machine. The same should also be done while handling other shared surfaces such as computer, keyboard and mouse.
4. Avoid sharing towels and handkerchiefs.
5. Seek medical care in case of redness, itching, pain, swelling or any discharge from eyes.
